| EDUCATION | PhD University of California at Davis , Davis, CA, (September 2012 - December 2017) Major: Cognitive Neuroscience Advanced to Candidacy September 2015 <i>Thesis Topic:</i> Anxiety Impacts Attentional and Inhibitory Control in Adolescence Honors ScB. , Brown University, Providence, RI, (September 2006-December 2010) Major: Cognitive Neuroscience <i>Thesis Title:</i> Concordance of Movement and Heart Rate Responses in Fetuses at Risk for Autism | | |
| INTERESTS AND SPECIALIZATIONS | Anxiety Adolescence Event-Related Potentials | Attentional Control Neurodevelopmental Disorders Neuroimaging | Inhibitory Control Resting State fMRI Physiology |
| AWARDS AND CERTIFICATES | UC Davis Graduate Student Assembly Travel Award 2015-16 Academic Year UC Davis FUTURE Certificate Track 2015-16 Academic Year UC Davis Graduate Student Assembly Travel Award 2014-15 Academic Year ERP Boot Camp (Dr. Steven J. Luck) Completed July 2014 UC Davis Graduate Student Assembly Travel Award 2013-14 Academic Year | | |
| AFFILIATIONS | Association for Women in Science, <i>Student Member</i> 2013-present | | |
| DISSERTATION | Behavior and EEG Testing of Teen Anxiety Mentor: Dr. Tony J. Simon June 2013 - present A study of 20 adolescents with generalized anxiety disorder and 40 typical controls examining attentional and inhibitory control using event-related potentials, heart rate variability, and behavioral data. Participants complete four tasks and self and parent reports of daily function. | | |
| PUBLICATIONS | <i>Submitted:</i> Popa AM , Cruz J, Wong L, Harvey D, Angkustsiri K, Leckliter I, Perez-Edgar K, Simon TJ. Seeing Eye to Eye with Threat: Atypical Threat Bias Responses in Children with 22q11.2 Deletion Syndrome. <i>In Progress:</i> McCabe KL, Popa AM , Durdle C, Amato M, Cabaral M, Wong L, Harvey D, Simon TJ. Quantifying the resolution of spatial and temporal representation in children with 22q11.2 deletion syndrome. <i>In Progress:</i> Popa AM , McCabe KL, Morgan H, Garner J, Harvey D, Amato M, Simon TJ. Children with 22q11.2 Deletion Syndrome show Visuospatial Impairments on Bisection Tasks. | | |
| PRESENTATIONS AND POSTERS | <i>Selected from 13 Posters (5 first author) and 5 Presentations (4 first author) at International Conferences</i> <ul style="list-style-type: none"> Popa AM, Mayo D, Durdle C, Morgan H, Shapiro H, Ferrer E, Niendam T, Luck S, Carter C, Simon TJ. Attention and Inhibition Deficits in Youth with 22q11.2DS are Associated with Symptoms of Psychosis Proneness (an IBBC abstract). Poster Accepted at the 17th International Congress of the European Society for Child and Adolescent Psychiatry 2017, Geneva, Switzerland. | | |

- **Popa AM**, Durdle C, Morgan H, Shapiro H, Niendam T, Carter C, Luck S, Simon TJ. Highly Psychosis-Prone Adolescents show Increased Capture by Distractor Stimuli and More Effort to Inhibit Emotional Stimuli than Typically Developing Controls. Oral Accepted at the 16th International Congress on Schizophrenia Research 2017, San Diego, CA.
- **Popa AM**, Shapiro H, Harvey D, Amato M, Cruz J, Cung N, Reyes D, Simon TJ. Children with 22q11.2 Deletion Syndrome Show Lower Spatial and Temporal Acuity Than TD Children In Continuously Varying Tasks. Abstract Accepted at the 10th Biennial International 22q11.2 Conference 2016, Sirmione, Italy.
- **Popa AM**, Hunsaker N, Deng M, Garner J, Cruz J, Cung N, Reyes D, Simon TJ. Cortical Tissue Volumes Correlate to Cavum Septum Pellucidum Size in Children with 22q11.2 Deletion Syndrome and Typical Controls. Oral Accepted at the 71st Annual Meeting of the Society of Biological Psychiatry 2016, Atlanta, GA.
- **Popa AM**, Beaton E, Cruz J, Wong L, Cung N, Harvey D, Simon TJ. Adaptation to a Mild Stressor in Initially Anxious Children was related to their Attention to Perceived Threat in a Dot Probe Experiment. Poster Presented at the 70th Annual Meeting of the Society of Biological Psychiatry 2015, Toronto, ON, Canada.

RESEARCH EXPERIENCE

22q11.2 Research Center and Clinic

Dr. Tony J. Simon

MIND Institute at UC Davis, Davis CA

Graduate Student Researcher

June 2013 - present

Rotation Student

April 2013 - June 2013

- Analyzed behavioral, eye gaze, and pupillometric data from a dot probe threat bias experiment as they related to self report measures of anxiety and cognition in 47 children with 22q11.2 deletion syndrome and 32 typically developing children
- Designed, tested, collected data, and analyzed four ERP experiments examining adolescents with 22q11.2 deletion syndrome and typical controls on attentional and inhibitory control using neutral and emotional stimuli for a five-year NIH funded grant.
- Developed tasks for five behavioral experiments on the same study
- Analyzed resting state fMRI data from over a hundred participants with and without 22q11.2 deletion syndrome to examine differences in three networks isolated using ICA
- Trained and mentored four junior research assistants and seven volunteer interns

Reactivation of Neural Ensembles during Very Recent Memory

Dr. Brian J. Wiltgen

Center for Neuroscience at UC Davis, Davis CA

Rotation Student

January 2013 - April 2013

- Tested 6 mice in a fear learning paradigm
- Imaged tissue to determine coactivation of neurons during learning and memory

Poly-I:C Non-human Primate Model of Autism

Dr. Melissa D. Bauman

MIND Institute at UC Davis, Davis CA

Rotation Student

September 2012 - December 2012

- Developed tracing protocol and interrater reliability tests for lateral ventricles in macaque subjects' structural MRI scans
- Traced lateral ventricles in 24 subjects to assess structural abnormalities in primates at risk for autism due to maternal immune activation

Brown Center for the Study of Children at Risk

Dr. Mary C. Sullivan

Dr. Stephen J. Sheinkopf

Women and Infants Hospital, Providence RI

Research Assistant

January 2011 - May 2012

- **Preterm Infant to Adult Study:** A study comparing a longitudinal sample of young adults who had been born pre- or full term on several measures, including cardiology, executive function and stress response.

- **Autism Cry Study:** A study comparing cries from infants at high or low risk for autism to develop an early predictor of the disorder

Concordance of Movement and Heart Rate Responses in Fetuses at Risk for Autism

Dr. Stephen J. Sheinkopf

Brown University, Providence RI

Senior Honors Thesis Project

September 2009-December 2010

- Developed a research question and methodology; collected, analyzed and reported on data
- Compared a sample of fetuses at high risk for autism (one or more confirmed siblings or parents with autism) to a group of normal controls on concordance between movements and heart rate. This was observed at rest and in response to social and asocial stimuli

Virtual Environment Navigation Laboratory (VENlab)

Dr. William H. Warren

Brown University, Providence RI

Research Assistant

May 2007-December 2010

- Ran 6 experimental paradigms in virtual reality and the real world on human participants to study navigation and locomotion

Functional Magnetic Resonance Imaging in Theory and Practice

Dr. David Badre

Brown University, Providence RI

Class Research

September 2009-December 2009

- Designed, executed, analyzed, and reported an fMRI experiment in small groups. Our experimental stimuli were comprised of neutral words, words expressing fear, neutral faces, and faces expressing fear to measures brain activation in response to different modalities of fear stimuli

**CLINICAL
EXPERIENCE**

The Groden Center

Providence, RI

Treatment Teacher

June 2009-December 2009

- Worked as a treatment teacher in a classroom for adolescents with severe autism and profound behavioral problems doing individualized lessons and therapies
- Helped take children and adolescents with severe autism on community field trips

Writers' Group

The Swearer Center at Brown University, Providence, RI

Facilitator

February 2009-May 2009

- Planned and facilitated weekly lessons and activities with a student organized group that prepares writing workshops for adults with developmental disabilities in the local community.

Bonn Nontapum

Cross Cultural Solutions, Bangkok, Thailand

Volunteer

September 2008- December 2008

- Performed play and life skill activities with children at a home for children with special needs in Thailand

**TEACHING
EXPERIENCE**

Neurobiology

Dr. Lee M. Miller UC Davis Department of Neurobiology, Physiology, and Behavior, Davis CA

Teaching Assistant

April 2015-June 2015

- Planned nine weeks of discussion sections with two co-TAs. Prepared material for an hour of homework review, practice problems, and discussion of lecture material and readings.
- Independently led 3 one hour discussion sections for a total of 75 students each week.
- Held weekly office hours attended by around six students each session.
