TECHNICAL EXPERIENCE

App Annie — San Francisco, CA
Senior Data Scientist — August 2019 - present
- Building machine learning models to help businesses navigate the mobile app marketplace
- Modelling likely causes of interesting events to surface insights to our customers in the Data Stories product
- Leading adoption of best practices including version control, continuous integration, and code review among the data science team

Cogitativo (healthcare consulting start-up) — Berkeley, CA
Data Science Intern — April 2019 - June 2019
- Developed models, metrics, and Tableau dashboards from millions of records stored in AWS Redshift to understand healthcare operations data.

The Data Institute at the University of San Francisco — San Francisco, CA
Data Science Postdoctoral Fellow — August 2018 - July 2019
- Described nodes in brain networks from patients with schizophrenia and healthy controls using self-supervised machine learning (feature embeddings) resuling in one accepted publication and one in review
- Contributing to a web-based app for mass processing of electroencephalography (EEG)
- Consulted on collaborations with 3 private sector companies using computer vision and natural language processing
- Managed projects resulting in 2 published IEEE proceedings using PySpark and SparkML to make predictions on EEG data in collaboration with other researchers
- Instructed and developed an Introduction to Data Science class for 36 undergraduates
- Completed deep learning coursework using fast.ai and PyTorch (fast.ai certification course)

University of California at Davis — Davis, CA
Ph.D. Researcher — September 2012 - June 2018
- Used techniques including mixed effects linear modeling, k-means clustering, and ICA interpret data in participants' behavior and brain activity over time
- Trained and mentored 6 junior research assistants and 7 volunteer interns
- Produced 4 manuscripts (2 accepted) and completed 18 conference presentations
- Helped run a group for graduate students on machine learning and data science
- Consulted with members of the UC Davis community on data science problems from twitter scraping to genomics as an affiliate of the Data Science Initiative

TECHNICAL SKILLS

Software include: PySpark, Python, R, git, PostgreSQL, Tableau
Packages include: sklearn (contributor), pandas (contributor), NumPy, SparkML, PySparkSQL

EDUCATION

Ph.D., University of California at Davis, Neuroscience
Honors Sc.B., Brown University, Cognitive Neuroscience
